## BOOTCAMP 2: DESIGN THINKING

14 & 15 March | St. Gallen

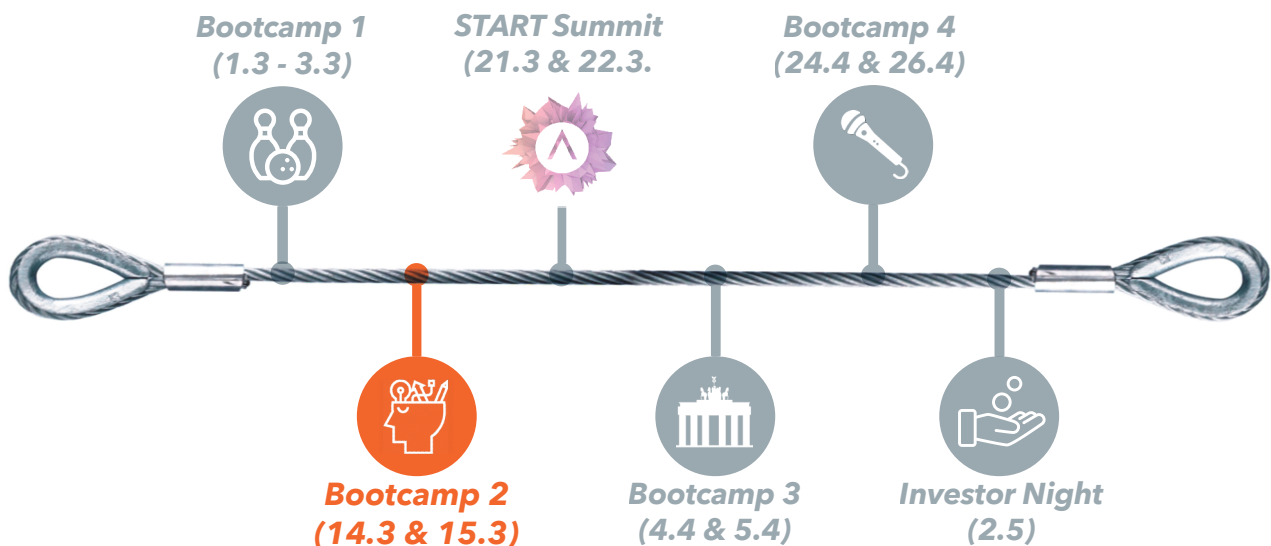

### AIM:

Building the basis for professional prototype development.

### DESCRIPTION:

With the second Bootcamp we enter the "Build"-phase. The goal of the two-day Bootcamp is for the startups to be given the tools and skills needed in order to be able to transform their validated business ideas into functioning prototypes around customer feedback. We focus on Design

Thinking as an approach for prototype development in order to encourage our startups to engage with all relevant stakeholders. It is important to us that our participants build their solutions around the customers' needs.
